New York City, NY | beatricestotz@gmail.com | (571) 969-9951 | <https://limeysharp.github.io/BeaDotCom/>

EDUCATION

Bachelor of Arts in Computer Science, *Columbia University in the City of New York* 2023-Present

- 3.91/4.00 Cumulative GPA
- Dean's List 2023-2026
- Relevant coursework: Data Structures in Java, Fundamentals of Computer Systems, Advanced systems Programming, Introduction to Databases, Computer Graphics, C++ Deep Dive for C Programmers

WORK EXPERIENCE

Research Project Lead, *Columbia University Geometry and the City Lab* Fall 2025-Present

- Leading project to visualize rock climbing walls in virtual reality with ML generated climbing paths
- Wrote program to sample point clouds from randomly generated seed-based rock climbing walls
- Training ML model to predict the difficulty of a generated climb

Cyber Intern, *Protek Information Technology Services* Summer 2025

- Explored Google SecOps test environment, evaluated SIEM and SOAR environments for analyst use
- Created use cases and playbooks in SecOps test environment
- Compiled and delivered findings to team, presentation later adapted for client use

Research Assistant, *INOVA Heart and Vascular Institute* Summer 2021, Summer 2022

- Awarded INOVA Summer Student Research Grant of \$2500
- Retrieved daily COVID-19 ECMO patient information from 80 patients in INOVA Electronic Health, assisted in development of a program to automate data transfer

PROJECTS

C-Blinker, *Columbia University* 2024

- A rudimentary C linker from scratch coded in C. Capable of linking together an arbitrary number of object files into a runnable executable.

Balloc, *Columbia University* 2024

- A rudimentary implementation of Malloc from scratch, coded in C. Implements segregated explicit free lists and boundary tag coalescing to manage memory more efficiently

BeaChat, *Columbia University* 2024

- A simple chat server that can accept multiple clients in multiple chats, coded in C from a provided skeleton. Programmed using Socket API, implements named sockets and a registry file of servers.

Dire Date Night, *Personal Project* 2024-present

- Lead programmer, artist, and cowriter for a visual novel, coded in Python using game engine RenPy

SKILLS

Technical: Java, Python, C, C++, Git, LaTeX, object oriented programming, basic art skills, basic blender

Languages: Intermediate Spanish, basic Korean
